5. EMERGENCY RESPONSE PROCEDURES

A. LOCATION OF THE COMMAND POST

In the event of a full-scale evacuation of a school, the Command Post will be established at the location specified in the Building-Level Emergency Response Plan, or as otherwise directed by the Incident Commander. This location will be used without regard to where the evacuees are going.

In the event the emergency requires less than a full-scale evacuation of any school the location of the Command Post shall be determined by the Incident Commander. It shall be established in a safe and accessible location within the outer perimeter and its location must be communicated to the Building Administrator through the 911 Emergency Communications Control Center as soon as possible. Whenever possible, the Command Post should have the availability of landline telephone communications.
B. **GENERAL EVACUATION**

Evacuations may be necessary in the event of fire, severe weather, emergencies, or violent incident. Upon notification of the need to evacuate, teachers should instruct students to remain calm and quiet, and depart the building in an orderly fashion according to previously established evacuation routes, or alternate routes as instructed.

Building occupants will be notified to evacuate the building by one or more predetermined emergency communication methods, depending upon the nature of the emergency:

1. Upon receiving an evacuation notice, faculty and staff should survey their areas and evacuation routes for hazards and/or suspicious hazards in order to ensure a safe and expeditious evacuation.

2. Suspicious items found must be left alone and immediately reported to the Building Administrator and/or emergency service personnel.

3. Normal evacuation routes will be used unless the emergency prevents use of exits and/or corridors. Alternate routes may be announced using the predetermined building notification method. The intercom system shall not be used in situations that may endanger students/staff (e.g., barricaded gunman).

4. Elevators may not be used for evacuation purposes unless approved by the emergency personnel.

5. All persons shall proceed to the designated Safety Zone and remain there until further notice.

6. Teachers should take attendance once in the designated Safety Zone, and notify the Command Post if a student is not present.

7. Any time teachers have to relocate their class; attendance must be taken before departure and upon arrival. If students are to be evacuated off-campus, teachers are to take attendance before students are loaded onto the buses and once again, when the buses are loaded, to ensure that all students are accounted for.

Occasionally, there may be a need to relocate students from the Safety Zone to a predetermined Relocation Center. If evacuation is ordered beyond the Safety Zone, students will be evacuated by bus either to their homes or a safe location. The decision to evacuate the Safety Zone will be made by the Incident Commander upon consultation with the Superintendent of Schools. Students will not be allowed to go home on their own. However, they will be permitted to leave school if accompanied by a parent.

C. **EVACUATION OF DISABLED STUDENTS, STAFF AND FACULTY**

In the event of an evacuation, special care must be taken to ensure that disabled persons are safely transported out of the building.

1. An Assisted Evacuation Plan form should be completed for every child or staff member who has limited mobility and for any other person who would require assistance to leave the building in an emergency or require any kind of special accommodations during an evacuation. The Assisted Evacuation Plan should designate the person responsible to assist in evacuating the person as well as alternates for situations in which the person with primary responsibility is not available.

D. **SHELTERING**

Not all emergencies will require that occupants of a building leave and go somewhere else. A sheltering procedure is appropriate for situations when it is necessary to temporarily hold students in an inside Safety Zone during an Emergency.

1. A determination to shelter inside the school building shall be made by the Building Administrator based upon his or her knowledge of the circumstances surrounding the emergency. The Building Administrator shall inform the 911 Control Center and the Superintendent of Schools of the determination, and may consult with the Incident Commander regarding the decision.

E. **LOCK-DOWN (“STAY-IN-PLACE”)**

A lock-down procedure is appropriate for situations which mandate that students remain in one location until authorized to move. General procedures are as follows:
1. A stay in place (lock-down) procedure is called when leaving or walking through the building would endanger the health and safety of the students or staff. The procedure may involve some or all persons within the building, depending on the nature and location of the emergency.

2. The Building Administrator will apprise all building occupants of a stay in place (lock-down) order using the predetermined emergency notification method. Students and staff shall remain in their classrooms or work-area until the Building Administrator or law enforcement gives different instructions.

3. Parents are NOT to report to the school to sign out their child. The Superintendent (or his/her designee), will provide information and updates to parents and the media at a predetermined location.

F. EARLY DISMISSAL
An early dismissal is appropriate in the event of a system failure (such as heating, plumbing or electrical, etc.), or other emergency situations as decided by the Superintendent of Schools, that renders the building unsuitable for instructional purposes.

6. RESPONDING TO THREATS OF VIOLENCE
The District shall make continuing efforts to assure that threats of violence are addressed, whenever possible, before any violence actually occurs in the school environment. This protocol is intended to identify credible threats of violence, so that District authorities can address such situations before the threat is carried out. This protocol is applicable during any school-sponsored event or function, held on District property or elsewhere.

3. Other agencies participating in the Emergency Response Plan (e.g., Police, Fire Dept., EMS) should conduct appropriate training.

15. EMERGENCY DRILLS AND EXERCISES

A. CONDUCT OF DRILLS
   1. Exercises and drills must be conducted in accordance with State Education Department regulations.
